PERSONAL STATEMENT

Master's in Data Science and AI graduated with Merit from the University of Liverpool, with a background in Business Administration, majoring in Management Information Systems and Marketing (GPA 3.77), and receiving a High Distinction award from Qatar's Head of State. Experienced in data analytics, business operations, project reporting, and delivery. Quick learner who performs well in fast-paced environments.

EDUCATION

University of Liverpool, Department of Computer Science, Liverpool, England

Master's in Data Science and AI | Graduated with Merit (September 2024 – December 2025)

- Relevant Coursework: Applied AI, AI and Communication, Big Data and Society: Algorithms and Platforms, Research Methods in Computer Science, Data Mining and Visualization.

Qatar University, College of Business and Economics, Doha, Qatar

Bachelor's in Business Administration (August 2019 – September 2023)

- Major: Management Information Systems (MIS), Minor: Marketing.
- Cumulative GPA: 3.77/4.00
- Obtained The High Distinction Award.
- Qatar University Dean's List (2019 – 2023); QU Vice President's List (2019 – 2023).

WORK EXPERIENCE

Qatar National Bank, Internship Trainee, Doha, Qatar (June 2023 – July 2023)

- Responsible for account services, and delivered some day to day banking tasks such as card requests and digital banking support, served about 8 customers per day effectively while ensuring accurate documentation of each.
- Coordinated work with banking specialists from different departments to solve more than 30 customer enquiries in total and received positive feedback from the managers.

FIFA World Cup Qatar 2022, IT Assistant Volunteer, Doha, Qatar (Aug 2022 – Dec 2022)

- Worked alongside IT specialists to deliver IT support to the events and supported the teams on technical request mostly software related issues.
- Tracked these issues and resolved them efficiently with IT professionals and documented these tasks to forward them to the management team.

PROJECT PORTFOLIO & ACADEMIC EXPERIENCE (Additional projects available at: <https://hadi-git1.github.io/>)

UK Data Job Market Analytics (Python, Adzuna API, Tableau) — 2026

- Built an end-to-end data pipeline in Python (requests, pandas) querying the Adzuna API across 5 search terms and 12 UK cities, collecting 2,500+ live job listings and cleaning them into a validated dataset of 2,100+ records through deduplication, standardisation, and salary normalisation.
- Built a keyword-detection model to flag 26 in-demand data skills (SQL, Python, Power BI, Azure, AWS) across job titles and descriptions, then computed skill co-occurrence to identify which tools employers request together, such as Power BI and SQL.
- Published an interactive Tableau dashboard visualising regional salary trends and skill demand, revealing a ~28% average salary gap between London and Cardiff for comparable roles.

MSc Dissertation “BUNKR”: Offline Password Manager (Python, PySide6, SQLite) — 2025

- Designed an offline password manager in Python using features like PySide6 and SQLite building the UI, the cryptographic logic and a secure storage separately.
- Implemented a modern cryptography system for PIN and password recovery flows based on Cryptographic Algorithms such as PBKDF2, AES-GCM / ChaCha20-Poly1305 encryption.
- Added multiple security features such as password duplicate and similarity detection, password strength warnings, auto-lock screen when the user is absent, clipboard auto-clear when copying a password. Performed multiple tests to fix any errors on these features and in the UI in general while keeping a balance between security and usability.

Merseyside River: A CA-ffé Simulation of Potential Flood Damage — 2024

- Led project planning and scheduling for a group simulation assessing a proposed tidal barrier on the River Mersey, balancing clean energy goals with flood prevention.
- Built and maintained a Gantt chart across three phases, keeping the team on track to deliver the flood risk assessment ahead of deadline.

Data Cleaning and Visualization for Healthcare facilities in Qatar (Excel & Tableau) — 2023

- Cleaned and standardized a large healthcare facility dataset using advanced Excel functions (e.g., PivotTables) to improve data quality and consistency.
- Designed and built interactive Tableau dashboards to visualize KPIs, categorize facilities, and track yearly improvement trends for strategic decision-making.

Project Manager, FIFA 2022 Sustainability Analytics Dashboard (Excel & Tableau) — 2022

- Led end-to-end project planning for a Tableau sustainability dashboard tile aligned to a UN sustainability goal, defining scope, KPIs, and a clear narrative with the developer, and building the WBS/schedule from training through testing and submission.
- Managed delivery governance by translating the plan into a budget with contingency reserves, tracking progress and variances through structured check-ins and status reports, escalating risks/issues, and documenting lessons learned for project closure.

SKILLS AND INTERESTS

Languages: English, French, Arabic.

Technical skills: Microsoft Office Suite; Python; SQL (MySQL, SQL Server/SSMS); Tableau; Power BI; Excel (PivotTables, XLOOKUP/VLOOKUP, charts); Canva; Adobe Express.

AI proficiency: Experienced user of Claude, ChatGPT, Cursor, and Gemini for accelerating development and research, applied critically alongside independent validation of outputs.

Analytics & Methods: Data cleaning; Descriptive Statistics; Survey Design; Data Visualization; Dashboarding/Reporting.

Interests: Green economy, Sustainable solutions and innovation, Smart cities and sustainable mobility, Data-driven policy.

ACHIEVEMENTS AND COMPETITIONS

Case Study Competition

Achieved 1st place, College of Business and Economics, Qatar University, Sponsored by Vodafone (2022)
Developed and presented a business case solution that placed first among competing student teams.

Fintech Competition

Reached 2nd place, Qatar Development Bank (2022) Co-developed a financial services application proposal recognised by QDB, awarded a monetary prize.
